Visual Zodiac, images of the Self

The original idea of this deck arose from the German artist Nil Orange, who had the thought of expressing all possible combinations of astrological symbols in images. It is an astrological card deck with 78 cards just like Tarot decks, but does not have much to do with them despite the number of the cards.

The deck is mainly designed for those interested in Astrology, and those people will be probably the ones who will take more advantage of them. However, everyone who works with images or is interested in symbolic languages (tarot, numerology, kabbalah, psychology, mythology, etc) can “see” and give meaning to the images suggested in each card.

With Visual Zodiac we attempted to integrate in a superior way the astrological qualities. We know that, because of its symbolic nature, there are many different levels of interpretation in each card, and the combined images can reflect many different levels. The deck resulted to be a rich

source of icons that reflect an integrated and synthetic of the different semblances of the Self.
