

Little Czech Oracle

Czechoslovakia was once a part of the Austrian Empire, so it is not surprising that they use original version Gipsy cards.

This is a modern take on the 32 card Beidermeir version deck, with current drawings and some skewing of a few card meanings. The LWB that comes with the deck is not in English, and the English labels used on these cards are imprecise synonyms of the traditional English labels used on the Biedermeier Gipsy.
