

Arcana Full Tarot Deck

This Second Edition deck has the dark background, and is the same size as a regular Poker playing card deck. The PIP cards are marked using the French style suits, but the corners do include Spanish style suit labels.

It is a prestidigitators deck, meaning that it contains extra gaff cards to perform magic tricks. The first edition had double sided King/Jack of Spades gaff cards, whereas this deck has double sided Death and Back cards.

This deck also includes two Jokers, so if you remove the Pages and Major Arcana cards, the deck becomes a regular Playing Card deck (a great choice for doing readings).

With the Pages and Majors in (but not using the Jokers), this deck becomes a good playing card sized Tarot deck.

The deck comes without any instructions for performing magic tricks, or for interpreting the cards in either a Playing card, or Tarot card, reading.
